✳ USER TIPS

Color Management

Several page and graphic applications have a built-in **Color Management System (CMS)**. As a general rule, Publishers suggests the **CMS** preference be turned **off** in all programs; however, there are special circumstances when it might be needed. Please contact your Desktop Service Representative (DSR) if you are unsure if CMS should be enabled or not. Listed below are locations of many of the **CMS** preferences.

Turn OFF Color Management in:

MAC

Acrobat

Acrobat 4: Go to *File > Preferences > General.* In the Color Management drop down menu, *u*nder the **Color** heading, select **Built-In CMS**.

Acrobat 5 (OS 9 or Classic): Go to *Edit > Preferences > General.* Select *Color Management* on the left side of the window. In the drop down window for **Settings,** select **Color Management Off.**

Acrobat 6 (also Acrobat 5 in OSX): Go to *Acrobat > Preferences > General.* Select *Color Management* on the left side of the window. In the drop down window for **Settings,** select **Color Management Off.**

FreeHand

FreeHand 9: Go to *File > Preferences > Colors.* Under the **Color Management** heading, select **None** in the drop down menu for **Type**.

FreeHand MX: Go to *File > Preferences > Colors.* Under the **Color Management** heading, select **None** in the drop down menu.

Illustrator

Illustrator 9, 10, CS: Go to *Edit > Color Settings*. In the drop down window for **Settings,** select **Color Management Off.**

InDesign

InDesign 2 & CS: Go to *Edit > Color Settings*. Deselect **Enable Color Management.**

PageMaker

PageMaker 6.5 & 7: Go to *File > Preferences > General.* Click the *CMS Setup* tab. In the drop down window for **Color Management,** select **Off.**

Photoshop

Photoshop 5 & 5.5: Color Management **cannot** be turned off. Publishers recommends that this version of Photoshop not be used.

Photoshop 6 (also Photoshop 7 in OS 9 or Classic): Go to *Edit > Color Settings*. In the drop down window for **Settings,** select **Color Management Off.**

Photoshop CS (also Photoshop 7 in OSX) : Go to *Photoshop > Color Settings*. In the drop down window for **Settings,** select **Color Management Off.**
PitStop

Using Acrobat 5 (OS 9 or Classic): Go to *Edit > Preferences > Enfocus PitStop Professional.* Select the *Color Management* tab. Deselect *Enable Color Management*.

Using Acrobat 6 (also Acrobat 5 in OSX): Go to *Acrobat > Preferences > Enfocus PitStop Professional.* Select the *Color Management* tab. Deselect *Enable Color Management*.

Quark

Quark 5 & 6: Go to *Utilities > Xtensions Manager*. Disable the **Quark CMS** extension. After disabling Quark CMS, restart Quark.

Quark

Quark 5 & 6: Go to *Utilities > Xtensions Manager*. Disable the **Quark CMS** extension. After disabling Quark CMS, restart Quark.
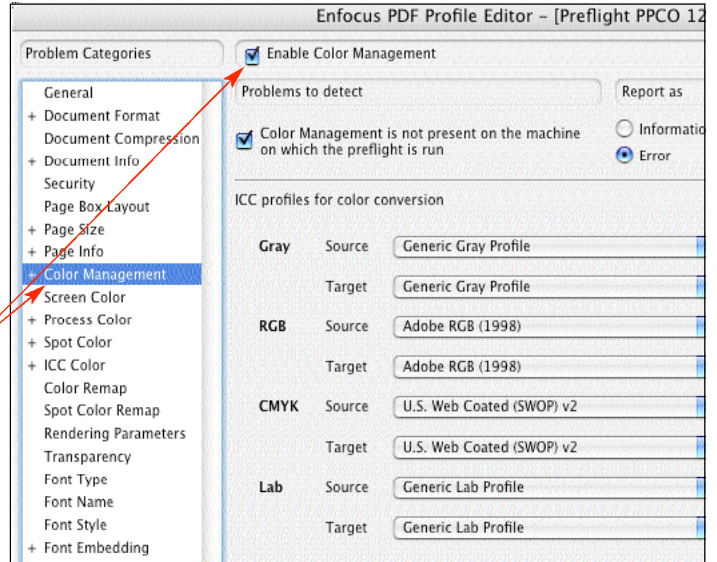

USER TIPS

Color Management, *Cont.*

Turn ON Color Management in:

Enfocus PitStop
If converting RGB images or spot colors using the Publishers' PitStop profile, enable the Color Management in the profile. Color Management should be selected **ONLY** in the Enfocus PitStop profile, not the preferences. When using this profile, please see **UT-37.4**.

Photoshop
Color Management should be selected in Photoshop when converting RGB images using Publishers' profile. When using this profile, please see **UT-15.1 & 15.2**.
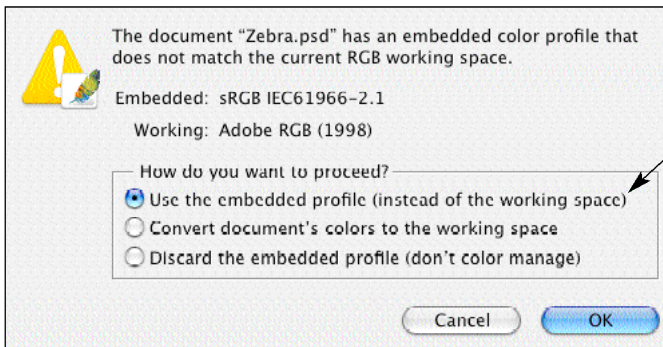

Photoshop Profile
When opening an image in Photoshop, you may receive a warning that there is a profile mismatch. This informs you that the image has a color profile tag attached (see figure 1).

Select the *"Use the embedded profile"* option. The image will be converted using the Publishers' profile after the image is open. Please see **UT-15.1 & 15.2**.
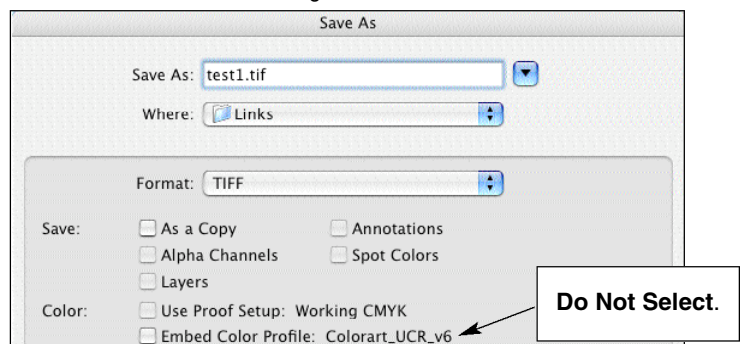

When saving an image in Photoshop, *do not* select *"Embed Color Profile"* option (see figure 2). If this option is selected, a tag is attached to the image and the profile is not truly embedded. When the image is converted using the Publishers' profile, the profile will be embedded automatically when the image is saved.

figure 1

Select this option when opening images.

figure 2

Do Not Select.
